About This Content

El Dorado is the fifth expansion to Europa Universalis IV and brings to life the conquests, creeds and discoveries synonymous with the Age of Exploration. The centerpiece of the latest addition is the Nation Designer, which allows the customization of a starting nation in a campaign and further enhances EU4's already near infinite replayability.

This expansion's focus on Central America and South America introduces new religions whilst impactful theaters of exploration will challenge you with new decisions worthy of a king or conqueror. As the Aztecs, subject the Mexican plain to your rule but be sure to have enough vassal kings to sacrifice to your angry gods. As the Europeans, push deeper into the jungles of the Amazon, following rumors of lost cities and magical fountains.

Whatever path you choose, El Dorado is sure to be a golden addition to your Europa Universalis IV playing experience.

Main features:

-
- A deep Nation Designer gives you new starting options for your games, including national ideas and custom monarchs.
 - Experience the new Nahuatl, Inti and Mayan religions with blood sacrifices or Sun Worship.
 - Send your conquistadors to hunt for the Seven Cities of Gold, or your explorer on exploration missions around the world.
 - Gold Fleets can traffic New World wealth back to Europe, and be targeted by your privateer fleets.
 - Use your trade fleets to hunt dangerous pirates.
 - Maintain good relations with the Pope so you can get a corner of the world to call your own in the Treaty of Tordesillas.

this is early access and thats why i cant blame it for being like it is. but it really sucks. Its ok for the price. So if you like trying indie games without much expectation then perhaps you will find this one worth it for you.. The game is too simple. Add more enemies. And more lore. And bosses. And bonfires. The connection to Murakami's work seems to be in reference only- I wouldn't say the game explores many of the themes common in Murakami's work. When the game worked, it was pretty whimsical. When it didn't, it was an obtuse chore. Best played with a guide to avoid visiting the same locations over and over to see if anything's changed.. This badly cropped asset-rip game is terrible in all ways.

- repetitive 1 track of music
- anime heads' white outlines from bad cropping is visible
- the puzzles are predetermined, this is nothing more than a reaction test.
- Bottles spawn in the same few places constantly in collect mode and has no clear win condition.

Great graphics and overall art style. Reminds me of the turret puzzles in portal with the great twist of super hot. The game could use some music though but for the first day of release it is great.. Haven't played much, but I am sold on the Macross experience.. A brilliant RPGmaker game

Part farming sim
Part Pokemon
But a ton of fun

It is very well made, but have a few bugs.

Definatly worth the money.. the map was ok but short and easy, if you compare it to illusion. unless you want to get disappointed you should play this before you do illusion.. Kill their men.

Sleep with their women.

This is the way of the doomslayer... THE DOOMSLAYER OF PUSS *airhorn dubstep*. Fan of GDS- WMMA series from the initial to the 4th installment. After I finally got burnt out from playing those, I decided to try TEW. I think its a bit more tedious then WMMA series mainly because you have to book the result/angles/appease the lockerroom/etc but I feel there is more micromanaging prowess in comparison to WMMA series. If you are unsure whether or not you like complete/ultimate power running everything, then try the demo at GreyDog Software website.

The game is has great mods as well that you can get from the GreyDog Software forums, so you can actually use use world mods/etc.

Fun game.. 5/10

Poor gameplay. Poor narrative experience. Good mechanics.. Fun making videos and learning new techniques.
